

Residential Building Permits

1. Provide the building area per each floor, including decks and garages.
2. Floor Layout: Show the arrangement of walls. Note the proposed use and the dimensions of all areas.
3. Windows and Doors: Show the location and dimensions of new, removed or replaced windows, doors and skylights. Indicate the opening direction and size.
4. Fixture Location: Show the location of fans, vents, smoke detectors, bathroom fixtures, mechanical equipment, etc.
5. When structural changes are made, the building plans examiner may require that plans be stamped by a licensed Washington State architect or engineer.
6. Show compliance with residential sections of the [Washington State Energy Code \(WSEC-R\)](#).
