Regarding the Project Proposal to construct a new Whittier Elementary School,

Case Number:

25-CU0002

25-VP0001

25-VP0002

The grounds of the current Whittier Elementary School, with its park-like setting, enhance the character of Fircrest. It is my hope that the new design will preserve this natural setting, including the magnificent Douglas firs that contribute to the health of our community, both physically and emotionally. The site is sufficiently large that it should not be necessary to remove these trees.

Thank you for your consideration.

Stephanie Ostmann

Resident since 1988
